

150Ah&3.05Ah sodium-ion cells

- In layered oxide systems, the energy density has surpassed 150Wh/kg with a cycle life of over 3000 cycles.
- In polyanion systems, a cycle life of over 6000 cycles has been achieved.
- Great Power's sodium-ion batteries have entered the commercialization stage in China.

150Ah
Cell 54173206

Product model	54173206
Capacity	150 Ah
Charging/discharging rate	0.5 C
Cycle life	3000@80%
Charging Temperature	0~45°C
Discharging Temperature	-40~60°C
Applications	residential storage, EV battery

3.05Ah
Cell 26650

Product model	26650
Capacity	3.05 Ah
Charging/discharging rate	0.5 C
Cycle life	3000@80%
Charging Temperature	0~45°C
Discharging Temperature	-40~60°C
Applications	residential storage, EV battery
